Big cinema sound from a speaker that won't take over your living room

- Get that cool, minimalist look with a sound bar and wireless sub-woofer
- Feel part of the action with room-filling 3D sound
- Stream your digital music via built-in Bluetooth®

Fusing style with sound

Want that big cinema sound that keeps you on the edge of your seat, but don't want to fill your house with cables and speakers? Look no further. A stylish speaker bar for your TV gives a real cinema experience right in your own home. With virtual surround sound, explosions and loud effects will become more real – you'll hear the bullets fly by. Give your movies the sound they deserve; save space at the same time.

Movie sound from every angle – 3D audio effect

It'll feel like you're actually sitting in the theatre. No matter where you are in the room you'll hear the action all around you with virtual surround sound from the [CT60](#). For a more immersive experience try the [CT260](#), it uses S-Force PRO Front Surround technology developed by Sony to create a 3D audio effect with just two front speakers in a single bar. It delivers sound that bends around the room and straight to your ears.

Sound that packs a punch

Turn it up, feel the bass. With a powerful sub-woofer, the CT60 and CT260 deliver deep notes that add more drama to movies – you'll be jumping out of your chair. The CT60 has two front speakers that deliver 60W of clear, detailed audio. You get a bigger impact with the CT260, it has 300W of total speaker power. The CT260 has a wireless sub-woofer that delivers dynamic base from the tightest spaces. Pick it up, place it anywhere, it's light and compact and free from the clutter of cables.

Cool, minimalist look

Enhance your living room décor, without overpowering the rest of the interior. The CT60 has a compact hexagon design which is a chic addition to any home. It's stylish and practical – a sound bar not only fits in front of your TV but also on the wall, or on a shelf. It's flexible set-up, it complements your style wherever you put it.

Easy access to your favourite music

Forget tangled wires and awkward USB ports. Get quick and easy cable-free access to your favourite tracks thanks to built-in Bluetooth®. The CT260 allows you to stream music from your PC, tablet or smartphone straight to the crisp, powerful sound of a 2.1ch system. It's the missing link in your home entertainment system.
