**Crystal clear Hi-Res
Audio sound that
harmonises with your
home interior:
introducing the new**

Sony Glass Sound Speaker

- Produce a cosy atmosphere with the Glass Sound Speaker's crystal clear Hi-Res Audio sound that will fill the room
- Create a relaxing mood with elegant, interior matching design and illumination^[1]
- Access your favourite music with the touch of a button thanks to Spotify Connect^[2]

Sony has today announced a new Glass Sound Speaker, the LSPX-S2, a minimalistic and elegant portable home speaker that uses its design to produce stunning sound quality.

Elegant design

Blend your speaker seamlessly into your home thanks to the speaker's subtle design and finish. Whatever your interior design, the Glass Sound Speaker is a beautiful addition to your home.

Enhance the atmosphere of your home with the candlelight mode. This setting provides a relaxing illumination (1) atmosphere, to convert your house in to a calming space to get away from it all.

Crystal clear sound

Enjoy authentic, crystal clear sound that can fill every corner of the room, thanks to Sony's unique Advanced Vertical Drive technology - which allows the speaker to reproduce 360-degree sound. The organic glass^[3] body itself vibrates after being tapped by the actuator under it to spread the sound vertically in a 360-degree direction. The organic glass tube tweeter has a wider surface (compared to conventional speakers) to create crystal clear sound with minimal loss of volume. Additionally, the speaker is Hi-Res Audio compatible, letting you can hear the music the way the artist intended.

Easy listening

The Glass Sound Speaker has a small, compact body with 8 hours battery life so that you can use it anywhere in the home. Whether you are having a cosy family get-together or having a moment peace to yourself, this speaker has you covered.

It couldn't be simpler to play music on the Glass Sound Speaker. With

BLUETOOTH® connectivity you can quickly pair your smartphone to your speaker to kickstart your relaxing retreat. The speaker is also NFC One-Touch compatible for even faster and more convenient pairing. Thanks to the “Push & Play” function, just press the dedicated button on the speaker to stream songs via Spotify Connect^[4] with no need to go through your phone to access your music. You can also use Wireless Multi-room to connect with up to 10 other compatible Sony audio devices over Wi-Fi. Create a Wireless Multi-room configuration and transform every room into a serene space.

The LSPX-S2 Glass Sound Speaker is available from May 2019 with an SRP of €600.
