HOLIDAY 2020

Sony announces 'Ready for PlayStation®5' TVs

Jul 29, 2020 16:00 CEST

Sony announces 'Ready for PlayStation®5' for current BRAVIA™ TVs

Sony Europe today announced a line-up of its current BRAVIA TVs that are officially 'Ready for PlayStation®5'. The new 'Ready for PlayStation 5' tagline has been created in partnership with Sony Interactive Entertainment (SIE) to make it easier for consumers to select the optimum TV in preparation for the highly anticipated launch of [PlayStation 5 \(PS5™\)](#), the next-generation game console releasing this holiday season.

The first 'Ready for PlayStation 5' TVs from Sony include the standout [XH90 4K HDR Full Array LED](#) and [ZH8 8K HDR Full Array LED models](#)¹. The XH90 displays gameplay images of up to 4K resolution at 120 fps² with a very low input lag of 7.2ms³. The ZH8 is capable of displaying incredibly detailed 8K resolution images⁴ while also showcasing 4K resolution gameplay images at super-smooth 120 fps² (supporting spec varies by PS5 game). Both TVs will provide extremely smooth gaming experiences with the PS5 console.

'Ready for PlayStation 5' TV models also boast BRAVIA Game Mode, which allows users to automatically play games on the PS5 console with low latency. Thanks to BRAVIA Game Mode, users can wake both TV and PS5 with the DualSense™ wireless controller at once and also seamlessly control their PS5 using just the TV remote⁵.

Sony's TVs deliver beautiful pictures with vibrant colour and stunning contrast, thanks to the best-in-class family of X1 processors. Additionally, powerful sound that comes directly from the TV screen creates a highly realistic and captivating viewing experience. With Sony's cutting-edge proprietary technologies, users can become fully immersed in the true next-generation level of transformative play offered by PS5.

Sony, together with SIE, will continue to provide the ultimate gaming experience to PlayStation fans around the world with 'One Sony', a unique collaboration of creativity and technology across Sony entities.

For more information, please visit: <https://www.sony.net/bravia-gaming>

1 8K: 7,680 x 4,320 pixels. 4K: 3,840 x 2,160 pixels. Requires HDR compatible content from supported streaming services, such as Netflix and Amazon Video or HDR compatible content device connected via HDMI input. Requires HDMI® cables sold separately.

2 4K/120 fps display will be available via a future firmware update on BRAVIA TV.

3 The input lag is measured with XH90 via 4K/120 fps game HDMI input

based on internal testing conditions and may differ in real-time usage environment or specific conditions.

4 Display of 8K game images from PS5 will be available via a future firmware update on BRAVIA TV.

5 TV Remote provides automatic power sync and basic cursor controls of PlayStation game console.

"PlayStation", "DualSense" and "PS5" are registered trademarks or trademarks of Sony Interactive Entertainment Inc.
