## Sony brings you room-filling, cinematic sound

- **HT-CT780 and HT-CT380 Sound Bars with One-touch wireless streaming**
- **HT-XT100 TV Base Speaker with One-touch wireless streaming**

Whether you're mad for movies or a discerning music lover, home entertainment comes to life with a powerful multi-channel boost and plenty of style with brand new Sound Bar and TV Base Speaker models from Sony this Spring.

**HT-CT780 Sound Bar**

The sleek, low-profile HT-CT780 Sound Bar adds immersive, widescreen 2.1-channel audio to your TV viewing with less living room clutter. Delivering an awesome 330W total output, the HT-CT780 packs plenty of power to match today's plus-sized televisions with a screen size of 46" and upwards.

Movie dialogue, effects and music sound great wherever you're sitting, thanks to S-Force PRO Front Surround processing. Two-way speakers with dedicated tweeters add extra refinement and detail, while the supplied wireless sub-woofer assures impressively solid, extended bass.

Instantly access music stored on your smartphone or tablet with One-touch listening via NFC and Bluetooth®. Just touch your mobile briefly against the Sound Bar to start streaming that instant party soundtrack: the HT-CT780 can be controlled directly from your smartphone or tablet with Sony's SongPal mobile app.

Three HDMI inputs allow easy hook-ups of all your HD input sources, with just one HDMI connection to the TV. Serious home entertainment fans will welcome support for a wide range of HD audio codecs, while HDCP 2.2 pass-through allows full 4K streaming compatibility.

### **HT-CT380/HT-CT381 Sound Bar**

Ideal for TVs up to 46" screen size, the sleek, slim HT-CT380 can also be mounted on a wall or shelf. This slim, stylish Sound Bar provides 300W of powerful 2.1 channel surround sound, with S-Force PRO Front Surround ensuring a truly immersive experience. Also included, the compact wireless sub-woofer can be positioned in any handy spot for solid, satisfying bass.

Just like the CT780, it features One-touch listening via NFC and Bluetooth®, and can be controlled from your phone or tablet with the SongPal app. Also available, the HT-CT381 sports a stylish silver finish.

### **HT-XT100 TV Base Speaker**

Sitting right underneath your TV, the HT-XT100 TV Base Speaker adds extra oomph to movies and TV shows with 80W of muscular 2.1 channel sound, with solidly-controlled bass from the integrated subwoofer. Struggling to hear what they're saying on screen? Touch the Voice button and dialogue

snaps instantly into sharp focus. Stream music from your smartphone with NFC and Bluetooth®, or slip in a USB Memory Drive and play your favourite tunes.

Also joining Sony's home cinema range are the HT-CT180 and HT-CT80 Sound Bars plus the HT-XT100 TV Base Speaker. All offer superior sound quality and ease of use with Bluetooth® and NFC connectivity. The latest Sound Bar and TV Base Speaker additions to Sony's home cinema line-up are on sale in Europe from Spring 2015.
