Sony collaborates with Spinnin' Records artist Lucas & Steve to remix latest album tracks in 360 Reality Audio

Sony Europe has collaborated with Spinnin' Records to remix tracks from artist [Lucas & Steve's](#) latest album, *'Letters To Remember'*, in 360 Reality Audio. The tracks will be exclusively available on global music streaming service Deezer's dedicated 360 Reality Audio app until 2021.

Four tracks from the Dutch DJ duo's long-awaited album have been remixed by sound engineers from Ark360, based at The Crypt Studios in London, in [360 Reality Audio](#), a new immersive experience from Sony. 360 Reality Audio envelops listeners in immersive sound, letting them feel as if they are there at a live concert or with the artist recording in the studio. This is done using Sony's spatial sound technology. Individual sounds such as vocal,

chorus, piano, guitar, bass, and even sounds of a live audience can be placed in a 360 spherical sound field, giving artists and creators a new way to express their creativity. Listeners can immerse themselves in a sound field exactly as intended by artists and creators.

Available exclusively through Deezer for Deezer HiFi subscribers using their dedicated "[360 by Deezer](#)" app, listeners can now experience the following tracks from the album *Letters To Remember* in stunning 360 Reality Audio:

☒ *I Want It All*
