# True cinema sound with pioneering wireless freedom – the STR-DN1030 Home Cinema Network AV Receiver

- Experience movies with detailed, true-to-life cinema sound
- Stream all your media with built-in AirPlay and Wi-Fi®
- Flexible connectivity for every HD device with 5 HDMI ports

## State-of-the-art cinema sound

The

World's first wireless AV receiver

The STR-DN1030 is truly a pioneering product. It's the world's first AV receiver with built-in wireless connectivity. So you can stream songs effortlessly from your iPhone®, iPod® or iPad® with built-in AirPlay, or play music and movies from your PC, tablet and other networked devices with built-in Wi-Fi®. Built-in wireless also gives you access to a limitless world of on-demand entertainment through the Sony Entertainment Network, featuring more than 15 million songs, and internet radio from thousands of stations around the world.

## Every detail of every sound

From the subtle nuance of a whisper to the deep boom of an explosion, the STR-DN1030 brings every aspect of film soundtracks to life in rich, detailed audio with crystal clarity. It even calibrates the perfect sound for your home cinema room, using Advanced Digital Cinema Auto Calibration to optimise surround sound based on the speaker positions.

## Tailor your ideal sound

Enhance your listening pleasure with a range of acoustic modes, from Jazz Club to Sport – so you can select the best sound setting for your entertainment. There's even a mode that re-creates the soaring dynamics of the Berliner Philharmonic concert hall, for a truly classical sound.

## **Substance, style and smart connections**

The STR-DN1030 isn't just professionally engineered to perform brilliantly – it boasts the elegant looks and solid design you'd expect from Sony. It stylishly incorporates simple yet powerful controls with a complete range of device connectivity options, including five HDMI inputs, one HDMI output, a USB 2.0 input and – for the first time ever in an AV receiver – built-in Wi-Fi and AirPlay. The STR-DN1030 works with the Sony Media Remote app so you can use your smartphone or tablet as a remote control.
